

Covariant Action
diffeomorphism invariance
minimal coupling

```
graph TD; A["Covariant Action<br/>diffeomorphism invariance<br/>minimal coupling"] --> B["Local inertial frames<br/>Proper time definition<br/>=> Special Relativity"]; B --> C["Metric variation<br/>Bianchi identity<br/>=> Einstein equations"]; C --> D["Stress-energy conservation<br/>=> Geodesic motion<br/>(Universality of free fall)"];
```

Local inertial frames
Proper time definition
 $\Rightarrow$ Special Relativity

Metric variation
Bianchi identity
 $\Rightarrow$ Einstein equations

Stress-energy conservation
 $\Rightarrow$ Geodesic motion
(Universality of free fall)
